Objective

Computer science student with a strong interest in full-stack development and AI-driven systems, supported by hands-on experience in modern web and generative AI projects. Seeking to contribute to impactful real-world applications while continuously strengthening technical and problem-solving abilities.

Education

Noida Institute of Engineering and Technology, Greater Noida

2023 – Present

B.Tech in Computer Science and Engineering (AI)

CGPA: 7.5/10

L.N.J School, Madhubani, Bihar

2021

Class XII (BSEB)

Percentage: 70%

Skills

Programming Languages: C++, Java, Python

Frontend Development: HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS

Backend Development: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

GenAI: LLM API Integration, RAG, Vector Database, LangChain

CS Fundamentals: OS, DBMS, Computer Networks, OOPS, Data Structures and Algorithms

Developer Tools: Git, GitHub, VS Code, Vercel, Postman

Soft Skills: Problem Solving, Communication, Time Management, Team Collaboration

Internship

Web Development Intern — Unstop

📍 Remote

Jun 2025 – Aug 2025

- Contributed to a **production-ready web application** by building **responsive React.js components** and optimizing **frontend performance** using clean, scalable coding practices.

Projects

HealthnexAI – AI-Powered Predictive Healthcare Platform

- Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js, MongoDB, REST APIs, LLM APIs
- Developed an **AI-driven preventive healthcare platform** that analyzes lifestyle habits and family medical history to **predict potential disease risks**.
- Designed a **structured multi-step health assessment workflow** to collect user health data and enable **accurate machine learning-based risk evaluation**.
- Integrated **LLM APIs** to build a basic AI assistant (**NexAI**) that provides simple health insights based on user assessment data.

SnipixAI – RAG-based Multimodal Summarization System

- Tech Stack:** Next.js, Tailwind CSS, TypeScript, Node.js, Express.js, MongoDB, LangChain, RAG, Vector Database, LLM APIs
- Developed a **multimodal AI application** to process and retrieve information from PDFs, images, text data, Audio, etc.
- Designed and implemented a **RAG-based pipeline** using LangChain and Vector Database to enable **efficient semantic search** and **context-aware information retrieval**.
- Built a **scalable full-stack architecture** with an interactive UI for **real-time AI-driven summarization** and **low-latency user interactions**.

Certifications

- MERN Stack — Coursera
- Principles of Generative AI — Infosys Springboard

Co-Curricular Activities

- Contributor — GSSOC (Extended Edition) 2025
- Participated in Smart India Hackathon (SIH) 2025
